

RIT Student Chapter Students Adventure at 2019 WSCL in Orlando, FL

The RIT ASCE Student Chapter sent three students to the 2019 WSCL conference in Orlando, Florida. It was a very influential experience for all of the participants, as they have become even

more active members in the club in the short time since the conference. The students engaged in different workshops, seminars, and networking sessions that provided them with valuable skills and information to take back to their student chapter. It was an experience that they will not soon forget, as they

were able to learn more about ASCE and create long lasting relationships with other student chapters. Sending new students to this conference increases student involvement in our club, university, and community as a whole.
